

## Contractor's Certification of High-Efficiency Interior Lighting Systems

In accordance with Oregon Residential Specialty Code Section N1107.2 the owner, owner's authorized agent, or the general contractor must notify the Building Official in writing that one of the code requirements specified below have been met. The Building Division has developed this written certification process in order to facilitate code compliance as effectively and effortlessly as possible.

**N1107.2 High-Efficiency Interior Lighting Systems.** A minimum of fifty percent of the permanently installed lighting fixtures must be compact or linear fluorescent, or a lighting source that has a minimum efficiency of 40 lumens per input watt. Screw-in compact florescent lamps comply with this requirement.

The Building Official must be notified in writing at the time of final inspection that a minimum of fifty percent of the permanently installed lighting fixtures are compact or linear fluorescent, or a minimum efficacy of 40 lumens per input watt.

| This project is equipped with a minimum of 5   | 0% High-Efficiency Lighting System. |
