

CITY OF MCMINNVILLE
CHANDLERS ADDITION SANITARY SEWER REHABILITATION
PROJECT INFORMATION

Project Location

See attached map on reverse side.

Project Overview

Includes rehabilitation of portions of the sanitary sewer conveyance system and paving residential streets in the Chandlers Addition neighborhood. Rehabilitation techniques may include open cut and pipe bursting. The project consists of rehabilitation of approximately 42' of 6", 4,920' of 8" and 261' of 10" sanitary sewer; as well as new manholes and new lateral connections.

What To Expect

Proposed improvements may require short-term interruption of service (typically just a few hours) for connection of the private lateral to the improved wastewater system. After construction is complete, the City will evaluate all private sewer laterals connecting to the project mainlines. Properties with failing or non-standard laterals will be notified of the need to upgrade their lateral. This is done in an effort to reduce Inflow and Infiltration (I&I) into the City's sanitary sewer system. Affected residents may qualify for the City's lateral reimbursement program. For more information on I&I, visit www.mcminnvilleoregon.gov/engineering or contact Project Manager, Matt Bernards.

Construction Schedule

June - November 2024 Neighborhood notices will be posted and an additional public notice with detailed project schedule for this area will be mailed to residents prior to the start of construction.

Construction Contractor

Earthworks Excavation. The work will be reviewed, approved, and inspected by the City of McMinnville.

Project Cost

The City is replacing approximately 5,300 lineal feet of aging sewer piping with a total project cost of approximately \$1,837,000
