*Draft Final Report*

# Storm Drainage Master Plan

Prepared for  
**City of McMinnville**

April 2009

Prepared by  
**CH2MHILL**

# Contents

Section	Page
Acronyms and Abbreviations .....	ix
Executive Summary.....	ES-1
<b>1 Introduction.....</b>	<b>1-1</b>
1.1 Purpose and Need .....	1-1
1.2 Goals and Objectives.....	1-1
1.3 Intended Readers.....	1-2
1.4 Organization of This Document .....	1-2
<b>2 Watershed Characteristics.....</b>	<b>2-1</b>
2.1 Location .....	2-1
2.2 Study Area Delineation .....	2-1
2.3 Climate.....	2-2
2.4 Soils.....	2-2
2.5 Topographical Features .....	2-8
2.6 Groundwater.....	2-8
2.7 Existing Drainage Facilities.....	2-8
2.8 Existing and Future Land Use Conditions .....	2-13
2.8.1 Residential .....	2-14
2.8.2 Industrial .....	2-17
2.8.3 Commercial .....	2-17
2.8.4 Floodplain.....	2-17
<b>3 Methodology .....</b>	<b>3-1</b>
3.1 Basic Assumptions .....	3-1
3.2 Hydrologic Analysis .....	3-2
3.2.1 Sub-Basin Area (Acres).....	3-2
3.2.2 Design Precipitation Hyetograph .....	3-3
3.2.3 Percent Effective Impervious Area .....	3-3
3.2.4 Composite Soil Conservation Service’s Soil Curve Number .....	3-3
3.2.5 Lag Time (Hours) .....	3-3
3.2.6 HEC-HMS Model Calibration .....	3-3
3.3 Hydraulic Analysis .....	3-4
3.3.1 HEC-RAS.....	3-4
3.3.2 Dynamic Modeling of Cozine Creek .....	3-5
3.3.3 HY8.....	3-5
3.3.4 Pipe Hydraulics .....	3-5
3.4 Analysis Approach.....	3-7
<b>4 Basin Delineation and Model Parameters.....</b>	<b>4-1</b>
4.1 Major Drainage Basins.....	4-1
4.2 Sub-basin Delineation Methodology .....	4-2

4.3	Sub-basin Coding Convention .....	4-5
4.4	Description of Major Drainage Basins .....	4-6
4.4.1	Cozine Creek Basin (C) .....	4-6
4.4.2	West Cozine Basin (W).....	4-6
4.4.3	North Cozine Basin (N).....	4-6
4.4.4	Baker Creek Basin (B).....	4-6
4.4.5	Midtown Basin (M).....	4-6
4.4.6	Highway Basin (H).....	4-7
4.4.7	North Yamhill Basin (NY) .....	4-7
4.4.8	South Yamhill Basin (SY).....	4-7
4.4.9	East End Basin (E).....	4-7
4.5	Effective Impervious Area.....	4-7
4.6	Soil Loss Parameter.....	4-9
4.7	Initial Abstraction and Soil Retention.....	4-10
4.8	Lag Time.....	4-10
4.8.1	Sheet Flow .....	4-10
4.8.2	Shallow Concentrated Flow .....	4-11
4.8.3	Gutter, Pipe, and Channel Flow .....	4-12
<b>5</b>	<b>Rainfall Analysis.....</b>	<b>5-1</b>
5.1	Review of Design Storm Development Approaches .....	5-1
5.2	Design Storm Precipitation Depths .....	5-1
5.3	Development of Rainfall Hyetographs .....	5-2
<b>6</b>	<b>Runoff Analysis .....</b>	<b>6-1</b>
6.1	Peak Sub-basin Flows .....	6-1
6.1.1	Flow Calibration.....	6-1
6.2	Peak Cumulative Flows .....	6-21
6.3	Partial Sub-basin Flows.....	6-22
6.4	River Water Surface Elevations.....	6-23
<b>7</b>	<b>Hydraulic Analysis Results and Drainage Improvements .....</b>	<b>7-1</b>
7.1	Cozine Creek Basin.....	7-1
7.1.1	General Description.....	7-1
7.1.2	Problem Areas .....	7-2
7.1.3	Potential Projects.....	7-4
7.1.4	Additional Requirements and Comments .....	7-5
7.2	West Cozine Creek Basin .....	7-5
7.2.1	General Description.....	7-5
7.2.2	Problem Areas .....	7-6
7.2.3	Potential Projects.....	7-7
7.2.4	Additional Requirements .....	7-8
7.3	North Cozine Creek Basin .....	7-8
7.3.1	General Description.....	7-8
7.3.2	Problem Areas .....	7-9

	7.3.3	Potential Projects .....	7-11
	7.3.4	Additional Requirements .....	7-11
7.4		Midtown Basin.....	7-12
	7.4.1	General Description .....	7-12
	7.4.2	Problem Areas.....	7-12
	7.4.3	Potential Projects .....	7-13
	7.4.4	Additional Requirements .....	7-14
7.5		Baker Creek Basin.....	7-14
	7.5.1	General Description .....	7-14
	7.5.2	Problem Areas.....	7-14
	7.5.3	Potential Projects .....	7-15
	7.5.4	Additional Requirements .....	7-15
7.6		Highway Basin.....	7-15
	7.6.1	General Description .....	7-15
	7.6.2	Problem Areas.....	7-16
	7.6.3	Potential Projects .....	7-16
	7.6.4	Additional Requirements .....	7-16
7.7		South Yamhill Basin.....	7-16
	7.7.1	General Description .....	7-16
	7.7.2	Problem Areas.....	7-18
	7.7.3	Potential Projects .....	7-18
	7.7.4	Additional Requirements .....	7-18
7.8		North Yamhill Basin.....	7-19
	7.8.1	General Description .....	7-19
	7.8.2	Problem Areas.....	7-19
	7.8.3	Potential Projects .....	7-19
	7.8.4	Additional Requirements .....	7-19
7.9		East End Basin.....	7-20
	7.9.1	General Description .....	7-20
	7.9.2	Problem Areas.....	7-20
	7.9.3	Potential Projects .....	7-21
	7.9.4	Additional Requirements .....	7-21
7.10		Private Development Drainage Facilities.....	7-21
7.11		Stormwater Detention Considerations.....	7-21
<b>8</b>		<b>Operations and Maintenance Problem Areas and Claim History .....</b>	<b>8-1</b>
	8.1	Observed Problems and Claims .....	8-1
	8.2	Recommendations .....	8-2
<b>9</b>		<b>Water Quality .....</b>	<b>9-1</b>
	9.1	Topographical and Climate Information Relevant to Stormwater Quality .	9-1
	9.2	Types of Contaminants.....	9-2
	9.3	Observed Levels of Contamination .....	9-4
	9.4	Methods of Removal .....	9-4
	9.4.1	Nutrient Removal.....	9-4

9.4.2	Sediment Removal .....	9-4
9.4.3	Bacteria Removal .....	9-5
9.4.4	Organic Compounds and Solvent Removal.....	9-5
9.4.5	Trace Metal Removal.....	9-6
9.5	Regulatory Climate.....	9-7
9.6	Recommendations .....	9-8
9.6.1	Water Quality Testing .....	9-8
9.6.2	Catch Basin Types.....	9-8
9.6.3	Preservation of Open Channel Waterways.....	9-8
9.6.4	Passive Water Quality Treatment Facilities .....	9-9
9.6.5	Best Management Practices .....	9-9
<b>10</b>	<b>Recommended Projects.....</b>	<b>10-1</b>
10.1	Evaluation of Potential Pipeline Improvements.....	10-1
10.2	Recommended Capital Projects .....	10-2
10.3	Other Stormwater Program Recommendations .....	10-3
<b>11</b>	<b>Drainage System Standards.....</b>	<b>11-1</b>
11.1	Introduction.....	11-1
11.2	Integration of Water Quantity and Quality Control .....	11-1
11.3	Regulatory Framework .....	11-2
11.4	Summary of Revisions.....	11-2
11.4.1	General .....	11-2
11.4.2	Design Event Selection.....	11-3
11.4.3	Hydrology Calculations.....	11-3
11.4.4	Conveyance and Flood Control Design.....	11-4
11.4.5	Natural Channels.....	11-4
11.4.6	Detention Storage Requirements and Calculations (for Flow Reduction and Channel Stability).....	11-5
11.4.7	Sediment and Erosion Control.....	11-5
11.4.8	Landscaping, Operations, and Maintenance .....	11-5
11.4.9	Submittal Requirements and Approval Process.....	11-5

**Appendixes**

A	Design Storm Review
B	Hydrologic Analysis Data, Calculations, and Results
C	Hydraulic Analysis Data, Calculations, and Results
D	Example Ordinance
E	City of McMinnville Storm Drainage Design and Construction Standards

**Tables**

ES-1	Summary of Hydraulic Analysis Results .....	ES-3
ES-2	Recommended Capital Projects .....	ES-6
ES-3	Program Recommendations .....	ES-7

2-1	Hydrological Classification of Soils .....	2-7
2-2	Existing and Build-Out Land Use .....	2-14
3-1	Recurrence Interval and Annual Probability of Occurrence .....	3-2
3-2	Hydrologic Flow Monitoring Locations for Model Calibration .....	3-4
4-1	Major Basin Areas.....	4-2
4-2	Estimated Mapped Impervious Area by Zoning Designation.....	4-8
4-3	Curve Numbers by Hydrologic Soil Group.....	4-9
4-4	Manning’s Roughness Coefficients for Sheet Flow Analysis over Various Surfaces.....	4-11
5-1	Total 24-Hour Precipitation for Select Recurrence Intervals.....	5-2
6-1	Peak Drainageway Flows .....	6-22
6-2	South Yamhill Backwater Elevations at Cozine Creek.....	6-23
8-1	Operations and Maintenance Problem Areas .....	8-1
10-1	Recommended Capital Projects.....	10-2
10-2	Program Recommendations.....	10-4
11-1	Summary of Recommended Hydrology Methods .....	11-4

**Figures**

2-1	Watershed.....	2-3
2-2	Study Area .....	2-5
2-3	Soil Infiltration Capability.....	2-9
2-4	Zoning .....	2-11
2-5	Assumed Currently Developed Condition.....	2-15
3-1	Computing Flows in Minor Reaches .....	3-7
3-2	Hydraulic Deficiency Rating for Storm Pipes .....	3-7
4-1	Major Basin Map.....	4-3
5-1	Unit Design Storm Distribution .....	5-2
6-1	Cozine Creek Sub-basin Flows .....	6-3
6-2	West Cozine Sub-basin Flows.....	6-5
6-3	North Cozine Sub-basin Flows.....	6-7
6-4	Baker Creek Sub-basin Flows .....	6-9
6-5	Midtown & Highway Sub-basin Flows.....	6-11
6-6	North Yamhill Sub-basin Flows .....	6-13
6-7	South Yamhill Sub-basin Flows.....	6-15
6-8	East End Sub-basin Flows .....	6-17
7-1	Cozine Creek Basin .....	7-2
7-2	Comparison of 10-Year Maximum Water Surface Elevation Profiles Between Steady-State and Dynamic .....	7-3
7-3	Comparison Between 10-Year and 50-Year Maximum Water Surface Profiles.....	7-4
7-4	West Cozine Creek Basin.....	7-6
7-5	North Cozine Creek Basin.....	7-9
7-6	Midtown Basin.....	7-12
7-7	Baker Creek Basin.....	7-14
7-8	Highway Basin.....	7-16

7-9	South Yamhill Basin.....	7-17
7-10	North Yamhill Basin.....	7-19
7-11	East End Basin.....	7-20
	7-INDEX to 7-E5 Hydraulic Analysis Results.....	7-23
8-1	O&M Problem Areas.....	8-3
10-1	Recommended Improvements.....	10-5
10-2	1st Street from Adams Street to Evans Street.....	10-5
10-3	4th Street from Birch Street to Davis Street.....	10-5
10-4	Adams Street from 20th Street to 17th Street.....	10-5
10-5	Alpine Street from 7th Avenue to 12th Avenue.....	10-5
10-6	Brockwood Avenue to Edmunston Street then East to Drumwood Avenue.....	10-5
10-7	Cleveland Avenue from Davis Street to East of Villard Street.....	10-5
10-8	Elm Street and 12th Street.....	10-5
10-9	Evans Street from 15th Street to 17th Street.....	10-5
10-10	Galloway Street from 13th Street to McMinnville High School.....	10-5
10-11	Hilary Street from Clifton Court to Hilary Court.....	10-5
10-12	Kirby Street and 13th Street.....	10-5
10-13	Linfield Avenue from Baker Street to Melrose Avenue.....	10-6
10-14	McDonald Lane from 17th Street to 18th Street.....	10-6
