Intro to AMI (Area Median Income) for McMinnville, Yamhill County, OR

AREA MEDIAN INCOME: Calculated by HUD annually for different communities. By definition, 50% of households within the specified geographic area earn less than Area Median Income (AMI), and 50% earn more. AMI is adjusted based on household size and used to determine the eligibility of applicants for federally and locally funded housing programs.

- **LOW-INCOME:** Describes households earning at or below 80% AMI.
- **VERY LOW-INCOME:** Describes households earning at or below 50% AMI.
- **EXTREMELY LOW-INCOME:** Describes households earning at or below 30% AMI.

- The median income of all households for which income is reported
- HUD uses to measure affordability, county by county
- HUD bases affordability on household size
- Can also compare to straight AMI
- Useful for contextualizing home prices based on the likely affordability of expected monthly payments
- Allows for quantification of the suitability for workforce housing

McMinnville Central City Housing Study

Key Findings

Downtown McMinnville is an attractive place to be, but housing production has lagged expectations. Parking requirements may be the single largest obstacle preventing new housing from being developed here.

- Reducing required off-street parking allows smaller sites to develop that would be infeasible to develop otherwise due to space needed to provide parking
- Larger sites can fit more homes at lower price points if off-street parking requirements are reduced
- Allowable maximum height can only be attained when parking requirements are reduced to 1 per home, or less on sites smaller than a full block
- Eliminating off-street parking requirements entirely for retail helps with the feasibility of mixed-use developments
